Information

Launching HEALTHe NL from PCI Update - September 12, 2018

Starting September 12, 2018 MEDITECH users from all Regional Health Authorities will be able to launch HEALTHe NL from their PCI Module in MEDITECH. To launch HEALTHe NL from MEDITECH, you will need a HEALTHe NL account and have previously logged in. To learn more about how to launch HEALTHe NL from MEDITECH [click here](#).

eOrdering Referral tool

On June 10, 2018 a 'Referrals' tab was added to HEALTHe NL. The 'Referrals' tab is used to access myCCath - an application for approved clinicians to order cardiac catheterization.

If you click on the 'Referrals' tab under a specific patient's record, myCCath will open and auto populate the patient's demographic information into myCCath. Once it is open, you can complete a referral for the Cath lab.

"If you feel that you require access to this functionality, please contact Eastern Health Cardiology on call at 777-6300."

In addition, on the homepage in the left menu, you will see a 'Referrals' menu that allows you to access the myCCath. Click 'Cardiac Cath Lab' then the 'myCCath' icon. This will open myCCath displaying a list of referrals depending on the myCCath role assigned to you.

Labrador North Users

Labrador North users can view the Time Zone displayed on the header of each Clinical Document, Laboratory and Medical Imaging report in their local time zone (Atlantic AST). To learn how to change the time zone [click here](#) or from the HEALTHe NL homepage (left menu), click the 'Links' menu and then 'Changing the Time Zone.' You will see NDT or ADT (Newfoundland/Atlantic Daylight Saving Time) or NST or AST (Newfoundland/Atlantic Standard Time) next to the time displayed in the header of the report.

All community pharmacies are connected to the Pharmacy Network in Newfoundland and Labrador.

Please note when completing your medication reconciliation, ensure 'Active' and 'Completed' statuses are selected. Completed status means the patient may or may not have finished their prescribed medication. For further information please refer to the [HEALTHe NL Help Files \(page 90\)](#).

Available Information in HEALTHe NL

HEALTHe NL currently includes the following types of information:

- Patient medication histories from connected community pharmacies. 100% of community pharmacies province-wide are connected.
- Eastern Health MEDITECH data, including dictated reports, laboratory results, diagnostic imaging and encounters (since April 2015).
- Provincial immunization data from a 2003 year of birth onward.
- Central Health (since September 2016) and Western Health (since June 2017) laboratory results and encounters.
- Western Health clinical documents and diagnostic imaging (since February 2018).
- Central Health clinical documents and diagnostic imaging (since mid September 2018).
- Labrador-Grenfell Health clinical documents, laboratory results, diagnostic imaging, and encounters (since February 2018).

We love hearing from you!

Family physician Dr. Roy Chaulk is one of HEALTHe NL's biggest champions. [Click here](#) to learn how he has integrated HEALTHe NL into his daily workflow.

Do you want more information about HEALTHe NL or have HEALTHe NL feedback?

Please email the HEALTHe NL Program at HEALTHeNLProgram@nlchi.nl.ca or call our Service Desk 1-877-752-6006.
